

Managing Biobanking, Clinical & Analytical Testing Data Using Spreadsheets? Switch to an Advanced SaaS LIMS

A Cloud-based Laboratory Information Management System

Complimentary Services

Technical Support

Product Training

Instrument Integration

Reporting Templates

Product Upgrade

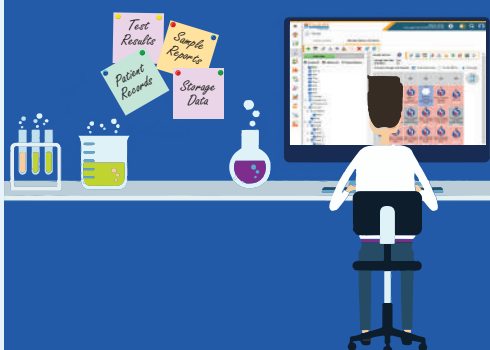

Legacy Data Migration

Automatic Backups

Pay as you go!

Key Benefits

360° Traceability

Comprehensive features for managing laboratory operations

Zero Capex

No investment in IT infrastructure

Accessibility

Access, transact & track information from anywhere

Collaboration

Collaborate & share in real-time

Save Time

Save time on initial installation & upgrades

Security and Reliability

Highest Up-time

99.9% @365x24x7 availability

Foolproof Security

Multilevel security on SOC compliant IT infrastructure

No Data Loss

Automatic data backup

Comprehensive Compliance

Follow 21 CFR Part 11, HIPAA, ISO 17025, ISO 15189, & CLIA Accreditation guidelines

An SOC 2 & ISO 9001:2015 Certified Software Company

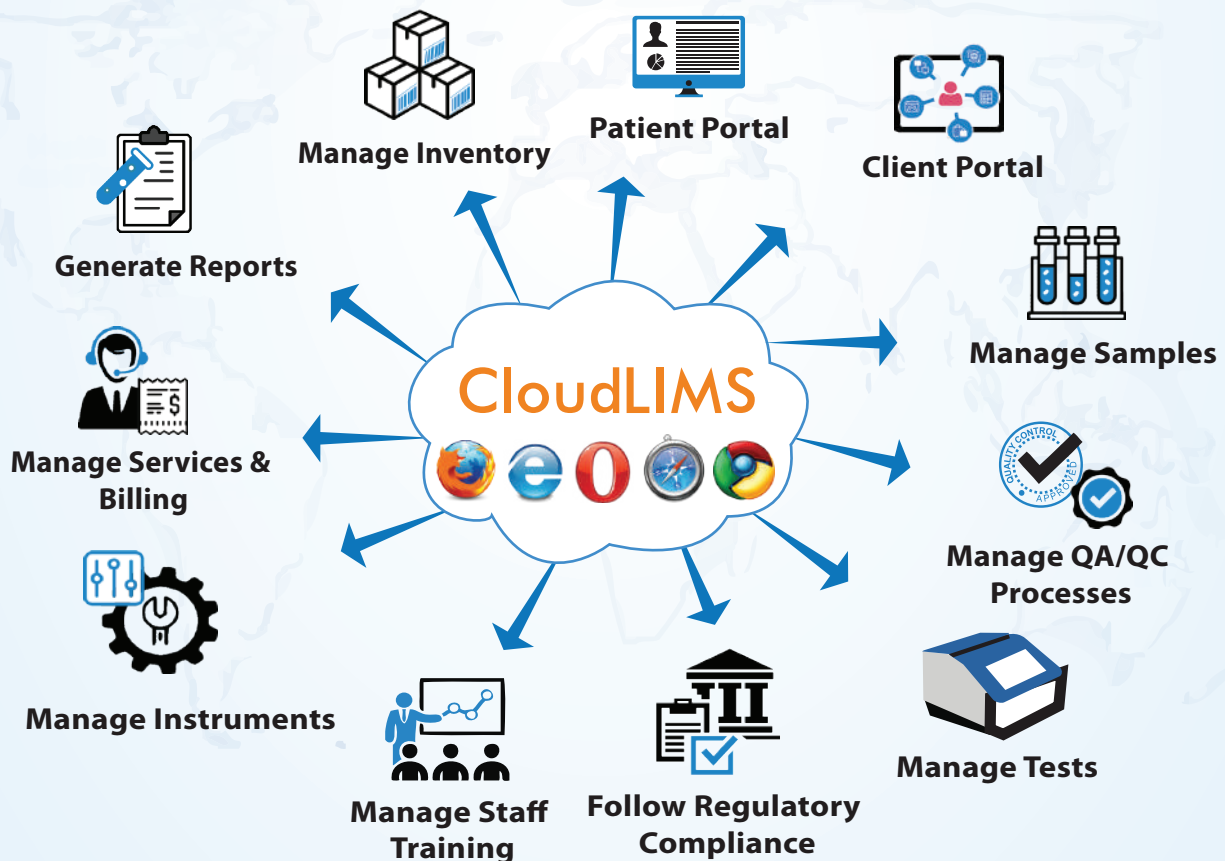

What Our Happy Customers Say

"We are very pleased to use CloudLIMS for managing multi-lab work-flows involving the collection of several different types of samples. With CloudLIMS's enhanced user group management and the unique configuration module, we could accommodate diverse work flows of six different types of labs into one single product. The access level control helps us manage data integrity. The complimentary data migration services were a big plus for us. It took the onus of uploading all the data off our shoulders and enabled us to get started with CloudLIMS without dedicated staff. I recommend CloudLIMS to whoever needs a LIMS solution for the life sciences."
